

TUCAN® Tactical Voice Terminal

Tucan® is a SIP enabled, multi channel Voice over IP (VoIP) terminal that handles red and black; intercom, point to point and radio (with PTT) voice communications in a single box

Product Features

- * Fiber connectivity for interconnect
- * Built-in large touch screen
- * Keypad for direct access dialing
- * Compliance with SIP standards
- * Rugged chassis
- * One touch channel assignments
- * Built-in Red & Black separation

Tucan® provides a seamless experience for the operator to monitor multiple radio channels from a single headset using the blended audio capability.

Using the built-in touch screen, operators can; select remote or local channels, monitor blended channels, initiate local/remote calls and utilize conference calls.
